

Multi-Function Transmitter for Pressure-Temperature with internal Temperature Sensor

AE-TPSI SERIE

Main features

- Pressure measuring ranges 0...1 bar to 0...1.000 bar
- Temperature measuring range -50°C to +150°C
- Output signals for pressure 0...10 V, 0.5...4.5 V
for temperature 0.25...4.75 V
- No internal transmission media
- Precision class 0.5 %
- Highly reliable
- Protection class IP67

Applications

- Hydraulics
- Pneumatics
- Air conditioning and refrigeration (HVAC) heating systems
- Plant and automation engineering

Description

This intelligent solution combines **two transmitters** which are capable of measuring **pressure and temperature** at the same time and **independently**.

This multi-functional transmitter has excellent characteristics for its stainless steel membrane and semi-conductor thin-film technology. The stainless steel membrane is absolutely vacuum-tight, extremely burst-proof and applicable with all standard media used in hydraulics, pneumatics, etc. as far as they are compatible with stainless steel. Its robust design guarantees high reliability also in rugged environments.

The temperature is measured by means of an internal temperature sensor.

Mechanical parameter

Parts in contact with the measuring medium*	stainless steel		
Housing*	stainless steel		
Shock resistance	g	1000	acc. to IEC 68-2-32
Vibration resistance	g	20	acc. to IEC 68-2-6 and IEC 68-2-36
Mass	m [g]	80-120	depending on design
CE - conformity	EC Directive 89/336/EWG		
IP system of protection	The IP system of protection as specified in the data sheets generally applies, with their mating plug connected. Relative pressure transmitters usually require a ventilated mating plug and/or cable to allow for pressure compensation. From a pressure range of 60 bar, a ventilated mating plug and/or cable is not necessarily required.
